Plot Spike®
Forage Oats

Plant PlotSpike® Forage Oats at 100 lbs. of seed per acre. Apply at least 300 lbs of 13-13-13 or equivalent at planting. PlotSpike® Forage Oats respond very well to high nitrogen fertilizers like ammonia nitrate (34-0-0) applied after the plants emerge. You can apply 150-200 pounds of 34-0-0 every 45 days and not harm your plants. In our seed fields we use the equivalent of 800 lbs of ammonia nitrate per growing season.

- 99% pure, no fillers, no chemical coatings
- Produces huge quantities of high quality forage deer love
- Easy to establish
- Cold tolerant
- Fast food plots
- Bred specifically for forage
- Fantastic early season, annual plot
- Can be planted in August and September for grazing during bow season

**LIFE CYCLE:** ANNUAL

**SEEDING RATE:** 100 - 120 LBS/ACRE

**BAG SIZE:** 50 LBS
