

# Lotus XL

## Birdsfoot Trefoil

- Tolerant of poorly drained, low pH soils
- High disease resistance
- Fast recovery after cutting
- Upright growth habit

Birdsfoot Trefoil is a perennial legume that adapts well to production on poorly drained, low-pH soils. It can re-seed itself, is resistant to Phytophthora root rot and numerous alfalfa insects, responds well to fertilization and does not cause bloat in animals. As a result, it is being grown more often in the northern United States and southern Canada where production of other forage legumes is limited.

Includes **CrosseCoat™**, an elite platform of proven seed coating and treatments to enhance germination, establishment and survival.

### BIRDSFOOTTREFOIL CHARACTERISTICS

ESTABLISHMENT	<b>SLOW</b>
PERSISTENCE	<b>HIGH</b>
DROUGHT TOLERANCE	<b>MED HIGH</b>
WINTER HARDINESS	<b>HIGH</b>
PALATABILITY	<b>HIGH</b>
YIELD POTENTIAL	<b>MED</b>
GRAZING TOLERANCE	<b>HIGH</b>
<b>PLANTING TIMES</b>	
<b>SPRING PLANTING</b>	<b>MAR - MAY</b>
<b>FALL PLANTING</b>	<b>AUG - OCT</b>
LIFE CYCLE	<b>PERENNIAL</b>
<b>SEEDING RATE (LBS/ACRE)</b>	
ALONE	<b>8 - 10</b>
MIXES	<b>4 - 5</b>
