

# SF 142 CLASSIC

## CRIMSON CLOVER + TILLAGE RADISH®

**SEEDING RATE:** 12 - 15 lbs/acre  
(heavier rate later in planting window)  
15 - 20 lbs/acre for forage

- **Ideal for acres going to corn or other grass crops; research shows positive results in V3 - V6 corn interseeding**
- **Simple mix to use on acres where excess moisture can be an issue, or prevent plant acres, etc.**
- **Low seeding rates work well in aerial seedings and where application options are limited**

**Termination:** Radish will terminate with multiple nights in the teens. If radish survive, glyphosate and 2,4-D offer an effective control method. If crimson clover overwinters, control with glyphosate and 2,4-D.

**Considerations:** When seeded early in summer/fall, consider additional grasses to help compete with the quick radish growth. Heavy crimson clover may invite voles.

### PLANTING WINDOW

1. NO LATER THAN AUGUST 20
2. NO LATER THAN SEPTEMBER 1
3. NO LATER THAN SEPTEMBER 10
4. NO LATER THAN SEPTEMBER 20
5. NO LATER THAN OCTOBER 1

### BENEFITS

COMPACTION ALLEVIATION	4	██████████
WEED SUPPRESSION	3	██████████
BIOMASS PRODUCTION	3	██████████
EROSION CONTROL	3	██████████
DISEASE/PEST CONTROL	3	██████████
POLLINATOR/BENEFICIALS	3	██████████
P & K CYCLING	4	██████████
EASE OF ESTABLISHMENT	4	██████████
