

# Flagstick Creeping Bentgrass

- Reduced inputs of fungicides, herbicides and fertilizers
- Superior turf quality in all environments
- Great for blends with 007, SR 1150 and Tye
- Excellent for greens, tees or fairways
- Less poa annua invasion for more uniform turf
- High performance all year round

## **DESCRIPTION**

Flagstick Creeping Bentgrass (*Agrostis stolonifera*) was developed by screening for superior dollar spot resistance over multiple years and locations in both fairway and greens trials. It is a versatile variety with high density and rapid tillering to keep out *Poa annua*. The high performance reduces expenses on fairways, tees, or greens. Flagstick is the result of 20 years of continual research, first at Michigan State, and later by Seed Research of Oregon. The long term development ensures Flagstick will have superior performance wherever you plant it on your course. Flagstick has other important benefits including high density and fine leaf texture. Combined with resistance to many important diseases including anthracnose, red thread, brown patch, pink snow mold and take-all patch your inputs with Flagstick will be reduced. Flagstick shows high seedling vigor and rapid establishment.

## **SEEDING RATES**

**SEEDS/LB:** 6,000,000  
**SEEDS/KG:** 13,228,000  
**NEW TURF:**  
1-2 LBS/1,000 SQ FT

## **OVERSEEDING/INTERSEEDING**

1/2-1 LBS/1,000 SQ FT

## **ESTABLISHMENT**

### **GERMINATION:**

5-10 DAYS UNDER IDEAL  
CONDITIONS

### **FIRST MOWING:**

21 DAYS AFTER EMERGENCE

### **FIRST LIMITED USE:**

6 WEEKS
