

Annual Habitat Hide-A-Way

- Summer planted annual mix offering bedding/buffer source
- Performs well on light to heavy soil types in light shade to full sun
- Quick to establish, requires 60 - 65°F soil temps for planting/germination, annual alternative to Perennial Habitat Hide-A-Way
- Can reach heights up to 8 feet tall

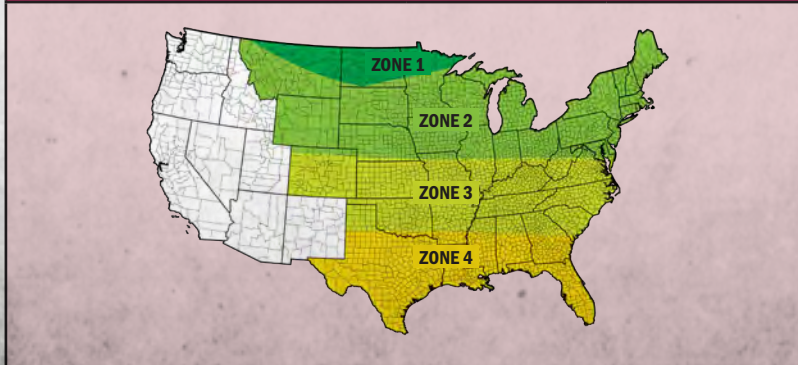

Annual Habitat Hide-A-Way is a summer seeded blend of sorghum x sudangrass, sunflowers and grain sorghum that offers up to 6 - 8 ft bedding/buffer zone/barrier for a tranquil deer setting. This annual blend should be planted into 60 - 65 degree soil temperature and will eventually terminate after winter. This mix can also be used to seclude paths, allowing for a stealth entry to hunting areas. Annual Habitat Hide-A-Way is an annual alternative to Perennial Habitat Hide-A-Way.
