

# Alfalfa-Based Forage Mix

- Especially suited for high quality forage environments
- Sound management will ensure this mix persists for 3-5 years
- Best adapted to well-drained soils in pH of 7.0 to 7.5, however clover will succeed in poorly-drained environments

## ALFALFA-BASED FORAGE MIX

**SEEDING RATE (LBS/ACRE):**  
18 -20

Alfalfa-Based Forage Mix is a dependable alfalfa based pasture mix designed for hay production where some grass is required.

Includes **CrosseCoat™**, an elite platform of proven seed coating and treatments to enhance germination, establishment and survival.
