

Clover-Based Forage Mix

- Formulated for wetter soils with a history of disease and fertility problems
- Use in soils with low pH (below 6.5)
- Provides strong nitrogen build up in soil

CLOVER-BASED FORAGE MIX

SEEDING RATE (LBS/ACRE):

16 - 18

Clover-Based Forage Mix is formulated for wetter soils that have a history of low pH (< 6.5), disease and winter survival problems. This dependable forage is excellent for grazing and hay production, plus building up nitrogen in the soil.

Includes **CrosseCoat™**, an elite platform of proven seed coating and treatments to enhance germination, establishment and survival.
