

Special Waterway Mix

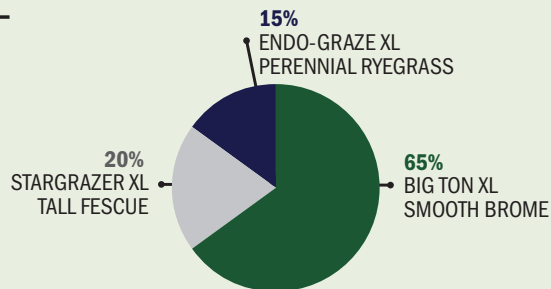

- Performs well in hay systems
- Big Ton XL smooth brome grass provides better quality than common types
- Mixed with endophyte-free tall fescue, persistence of this mix retains quality for many years
- Handles a wide range of soil types

SPECIAL WATERWAY MIX

SEEDING RATE (LBS/ACRE):

25 - 30

Special Waterway Mix was initially created to meet the specifications for the Iowa Conservation Division. It is an excellent choice for waterways, right-of-way ditch banks and critical seeding areas throughout Iowa and the surrounding states.

Includes **CrosseCoat™**, an elite platform of proven seed coating and treatments to enhance germination, establishment and survival.
